

December 2006 Meeting will be a works
visit to
Feed'n'Leave - a young and up and
coming company.
Refreshments provided.

Factory tour commences at 18:30 on Wednesday 13th December 2006.

Directions

From the A34 follow the A52 signed towards Leek onto King Street. At the second set of traffic lights turn right along Albert Street, continue to the end and turn left into Brunswick Street, immediately left into Shelton New Road and immediately left into Rope Street. The factory is located behind Castle Antiques which is on the left hand side of Rope Street, about 50m from the main road.

Welcome to PlantMinder

The PlantMinder™ is a self watering irrigation system for house plants, containers, Growbags, Troughs etc. The PlantMinder™ takes the guesswork out of watering and provides a low maintenance watering system, which can KEEP PLANTS WATERED FOR UP TO 6 WEEKS! Just like the name states, they are a plant minder

The PlantMinder™ Range consists of porous terracotta clay products, which are planted into the soil next to the plants roots with a reservoir of water to keep them topped up over time.

The Porous Terracotta allows water to seep through the PlantMinder™ very slowly. The plant roots are naturally attracted to this moisture and gravitate towards the source. Once the roots discover PlantMinder™, they wrap around it and take only what water is required for the plant to thrive. This avoids the necessity for constant watering or the danger of drowning the plant.

This makes the PlantMinder™ Range the essential watering and irrigation system for todays busy lifestyle and remember, it is not just for the gardener, it is for everyone!

You would look after your children with a child minder, now you can take care of your plants with a plant minder.
